EDUCATION

- **University of Kentucky College of Engineering** **Lexington, KY**
Bachelor of Science in Computer Engineering *Expected Graduation: Dec 2027 / May 2028*
Minors: Computer Science, Mathematics
 - **Relevant Coursework:** Data Structures, Software Engineering, Systems Programming, Discrete Mathematics, Numerical Methods, Digital Logic Design, Embedded Systems, Circuits I
-

WORK EXPERIENCE

- **GE Appliances** (*OBIA Automation and Validation Engineer*) *Fall 2026*
 - Developing OBIA automation and validation workflows for enterprise data processing using Oracle, ODI, ETL, and EDL.
 - Developing Python, SQL, and Shell automation for data validation, reconciliation, and processing workflows.
 - Investigating failed and blocked jobs, analyzing records, dependencies, and workflow behavior to identify potential root causes.
 - Collaborating with technical teams to improve data quality, automation reliability, and operational efficiency.
 - **SerSuite** (*Founder & Web Developer*) *Summer 2026*
 - Founding and operating a freelance web development business designing responsive websites for small businesses and organizations.
 - Developing websites using HTML, CSS, JavaScript, and modern web development platforms with emphasis on usability and responsive design.
 - Managing client requirements, website deployment, domains, maintenance, and basic SEO.
 - **Roblox** (*Customer Service Ticketing Support Representative*) *Remote | Summer 2023 - Fall 2025*
 - Managed high-volume support tickets using structured workflows, resolving technical, account access, and system-related issues.
 - Performed troubleshooting, issue investigation, and escalation of unresolved technical incidents.
 - Documented all troubleshooting steps, resolutions, and ticket updates in structured workflows.
 - Communicated technical solutions clearly to non-technical users in a remote support environment.
 - Followed ticket prioritization and escalation procedures to ensure timely resolution of issues.
-

TECHNICAL SKILLS

- **Programming & Scripting:** Python, Java, C++, JavaScript, MATLAB, SQL, Bash/Shell, HTML, CSS
 - **Data Engineering & Integration:** Oracle, Oracle Data Integrator (ODI), Oracle Business Intelligence Applications (OBIA), ETL, EDL, Data Validation, Data Reconciliation, Data Transformation, Data Pipelines
 - **Computer Engineering:** Digital Logic, Embedded Systems, Computer Systems, Hardware/Software Integration, Verilog
 - **Cloud & Development Tools :** Microsoft Azure, Virtual Machines, Docker, Git, GitHub, CI/CD
 - **Cybersecurity:** Host-Based Intrusion Detection, File Integrity Monitoring, SHA-256, Phishing Simulations, Security Awareness, Log Analysis
 - **IT & Systems:** Windows 10/11, Microsoft 365, Technical Troubleshooting, Ticketing Systems, Incident Management, Remote Support, Technical Documentation
 - **Networking:** TCP/IP, DNS, Routers, Switches, Wi-Fi Configuration, VPN Fundamentals, Network Troubleshooting
-

RELEVANT PROJECTS

- **Host-based Intrusion Detection System (HIDS)** (*Python • Security • Systems*) *Summer 2026*
 - Built a lightweight HIDS in Python to monitor file integrity and detect unauthorized system modifications
 - Implemented cryptographic hashing algorithms (SHA-256) to identify file changes and log anomalies
 - Designed detection rules and logging mechanisms
 - Optimized thresholds to reduce false positives while maintaining detection accuracy
